DECLARATION OF CONFLICT MINERALS COMPLIANCE

Dear Sirs,

The tubes and profiles we sell may contain metals covered by the Conflict Minerals Rules.

Swiss-Tube LNI supports the aims and objectives of the U.S. legislation relating to the supply of conflict minerals. Our due diligence processes and efforts conform to the relevant portions of the Organisation for Economic Co-operation and Development's ("OECD") internationally recognized due diligence framework for responsible supply chains of minerals from conflict-affected and high-risk areas.

We do not knowingly procure any 3TG that originates from the Conflict Region unless they originate from mines or smelters that are certified as "conflict free." To ensure compliance with the Dodd-Frank Act, we ask our suppliers to undertake reasonable due diligence with their supply chains to determine whether 3TG is being sourced from:

1. mines and smelters outside the Conflict Region or
2. mines and smelters that have been verified by an independent third party as "conflict free" if sourced within the Conflict Region.

Our suppliers confirm us that the elements contained in the tubes do not come from regions concerned by The Dodd-Frank Act. They participate in the Conflict Free Smelter program of the Electronic Industry Citizenship Coalition and the Global e-Sustainability Initiative.

If need be, official statements made by these smelters can be obtained upon specific request to our sales department.

Swiss-Tube LN Industries SA is committed in complying with the conflict Minerals Rules.

Yours sincerely

M. Motto Akam
